

LEAD LINED FRIDGE ENCLOSURES

RADIATION PROTECTION FOR FRIDGES, FREEZERS AND CRT CABINETS

LOCKABLE LEAD ENCLOSURES

Our range of lead lined fridge enclosures are the perfect solution to the storage of nuclear and radio pharmaceuticals. Where previously a lead lined fridge was a costly purchase and needed replacing in its entirety if there were issues with the fridge which couldn't be repaired, our lead lined fridge enclosures house standard pharmacy fridges or our own controlled room temperature (CRT) cabinets.

Lead lined fridge enclosures feature a stainless steel internal finish with a fan for venting and an internal power socket for the refrigerator.

Available with a shielding thickness of 3mm, 6mm, 10mm, 25mm and 50mm

All our lead lined fridge enclosures are delivered flat packed and assembled on site for ease of positioning and are available in sizes to meet your requirements.
